BRIEFLY

As a graduate research assistant at the University of Kurdistan, I work on representation learning with a focus on robustness and generalization. I also lead the Algebraic Machine Learning Team (AML team), a group that explores fundamental methods in unsupervised machine learning and representation theory. I have a Master's degree in Artificial Intelligence from the same university, where I worked with Dr. Parham Moradi and Dr. Fardin Akhlaghian on matrix factorization and low-rank approximation for various applications such as semi-supervised learning, recommendation systems, and multi-label classification. I also have an Associate and a Bachelor's degree in Software Engineering.

RESEARCH INTERESTS
